Hi there,

I am a UX Designer with 8 years in the corporate world, geeking out on user-centric designs for 4 years. I fearlessly push boundaries, merging industry know-hows with creative flair. Crafting captivating, user-centric solutions, I'm passionate about elevating experiences and fostering collaborative excellence.

Professional Experience

Globallogic, Noida

Senior Analyst, Design & Usability

(Jan 2022 - Present)

- Led the design and coordination of Sales Planning System for a leading mobile phone manufacturer, addressing complexities within the traditional system to deliver an effective solution.
- Collaborated on ER (Emergency Room) enhancements in the USA, conducting in-depth user research. Devised a streamlined Queue Management System, presenting High Fidelity Wireframes for implementation.
- Led the design of a Data Annotation solution, conducting thorough user research and stakeholder collaboration. Simplified complex processes through comprehensive flow and visual designs, boosting user productivity and reducing errors.
- Worked simultaneously on various organisation level initiatives and pre-sales activities.

Analyst, Design & Usability

(Dec 2019 - Jan 2022)

- Redesigned a prominent end-to-end security product in the USA, enhancing its usability and functionality.
- Designed a federated blockchain-based platform enabling secure information exchange between manufacturers and suppliers, ensuring data privacy without actual data sharing.
- Worked with product and engineering team to design user interfaces tailored to intricate calculations and diverse user needs, contributing to the enhancement of eye care services brand in USA.
- Designed several internal portals/websites for the organisation.
- Designed various monthly and quarterly magazines and news letters for different projects and delivery groups.
